About Me

I am a self-taught developer with relevant experience in web development, architecture, and design. I'm highly motivated, and I put passion into my work, delivering high and scalable products. I have experience with Javascript, React, NodeJS and MongoDB, PostgreSQL, and Redux.

From the moment I produced "Hello Word" in the console of my first application, I knew I was hooked on the world of web development. But web development has never been "just a job" for me, its offered an engaging challenge to continually learn and improve my skills in creating high-quality software. What started with a simple "Hello World" has become a full-fledged passion that only gets more exciting as the years go by.

Below you'll find projects I've completed that showcase my skills and general background in developing website.

Personal Projects

BAG

BAG is a MERN stack project that involves both front-end and back-end development. It also includes a user authentication API with a JWT Token and a third-party API ([restcountries](#)). The idea behind this project is to provide the user with countries that allow them to explore and add them to their list with a registered account (end-users can choose to register with an unverified email).

Note: This project is hosted on the Heroku cloud.

Audiophile

Audiophile is an e-commerce project that involves both front-end and back-end development; it uses User Authentication API with JSON Web Tokens.

Stack: PERN (PostgreSQL, Express, React, NodeJS).

Note: Also hosted on Heroku cloud.

Space Tourism

Challenging project from Front-end Mentor; was provided with Figma designs to convert them into a fully functional site. Additionally, I also added new functionality that performs swipe images which involve debounce and throttle functions.

Note: Hosted on Netlify cloud.

Education

Riara University

2019 - 2021 // Nairobi, Kenya, Mbagathi Way

Diploma in Computer Science

Relevant Courses:

- Web development
- Data Structure & Algorithms
- Data Communication & Networking

Skills

Libraries

ReactJS, Styled components, Framer Motion, Redux (State Management), Material UI, and Mantine UI.

Languages

HTML, Javascript, CSS/SASS/SCSS, and SQL.

Tools and Cloud Platforms

Git, GitHub Actions (CI/CD), Netlify, Heroku, and Firebase.

Testing

Jest

Other Tools

Figma, Adobe XD

Certifications

Web Development

June 2021 - Decemeber 2021

Certification ID: [190-251-504](#)

Full-Stack Engineer Career Path

August 2021 - Decemeber 2021

Credential ID: [CBAEGV569CHH](#)

Command Line Course

April 2019

Credential ID: [LFDY4W3WR46Y](#)

Interests

Football

Travelling

Swimming

Reading

Hiking
